

STEVE OECHSLE

DIRECTOR OF INFORMATION TECHNOLOGY

Steve Oechsle is Director of Information Technology at Emerge, where he is responsible for IT strategy, security, compliance, and infrastructure. With more than 13 years of experience in this role, Steve oversees technology infrastructure and digital transformation initiatives across multiple offices nationwide, focusing on secure, reliable, and efficient IT systems that support business growth and operational excellence.

Since June 2021, Steve has also worked as a Business Operations Analyst within a multinational digital communications technology corporation, providing project consulting on cloud services with a focus on Amazon AWS and Microsoft Azure marketplaces, automation of business intelligence, and global reporting to drive Co-Sell opportunities. Steve has leveraged his Salesforce Certification expertise to enhance CRM-driven insights and reporting, while also applying his AWS Certification knowledge to design and support cloud marketplace strategies that align with global business objectives.

Prior to joining Emerge, Steve served as Systems Engineer at ESL Federal Credit Union in Rochester, New York, where he maintained mission-critical infrastructure and applications across 23 locations, managing budget planning and leading key technology projects. He also worked as a Solutions Architect at Telemetry Supply, overseeing a fully integrated eCommerce solution including payment gateways, CRM, and workflow automation.

Steve holds an A.A.S. in Business Administration from Genesee Community College and numerous industry certifications, including Salesforce, AWS, Microsoft, HubSpot Reporting and Sales Hub Software. He is based in Rochester, New York, with his family and is an avid cyclist.

He is committed to delivering dependable, customer-focused technology solutions that empower teams and protect brand reputation.
